Software Engineering and Design
CS2 – Task 5: Architecture

Prof. Dr. Jürgen Vogel (juergen.vogel@bfh.ch)
Prof. Urs Künzler (urs.kuenzler@bfh.ch)

Software Architecture

For your application

- model the software architecture
    - high-level: UML component and deployment diagram
    - detailed: UML class diagram for main view of your application
- taking into account
    - system requirements
        - incl. the need for persistent data storage
    - architectural design pattern: MVP
    - the Vaadin framework

Presentation of Results: 03.05.19 (last unit), 5 min per team
- 10 points for documents (PDF)

Hints
- keep your project diary up to date
- place all work results in your repository under path `...\doc\task05\`
